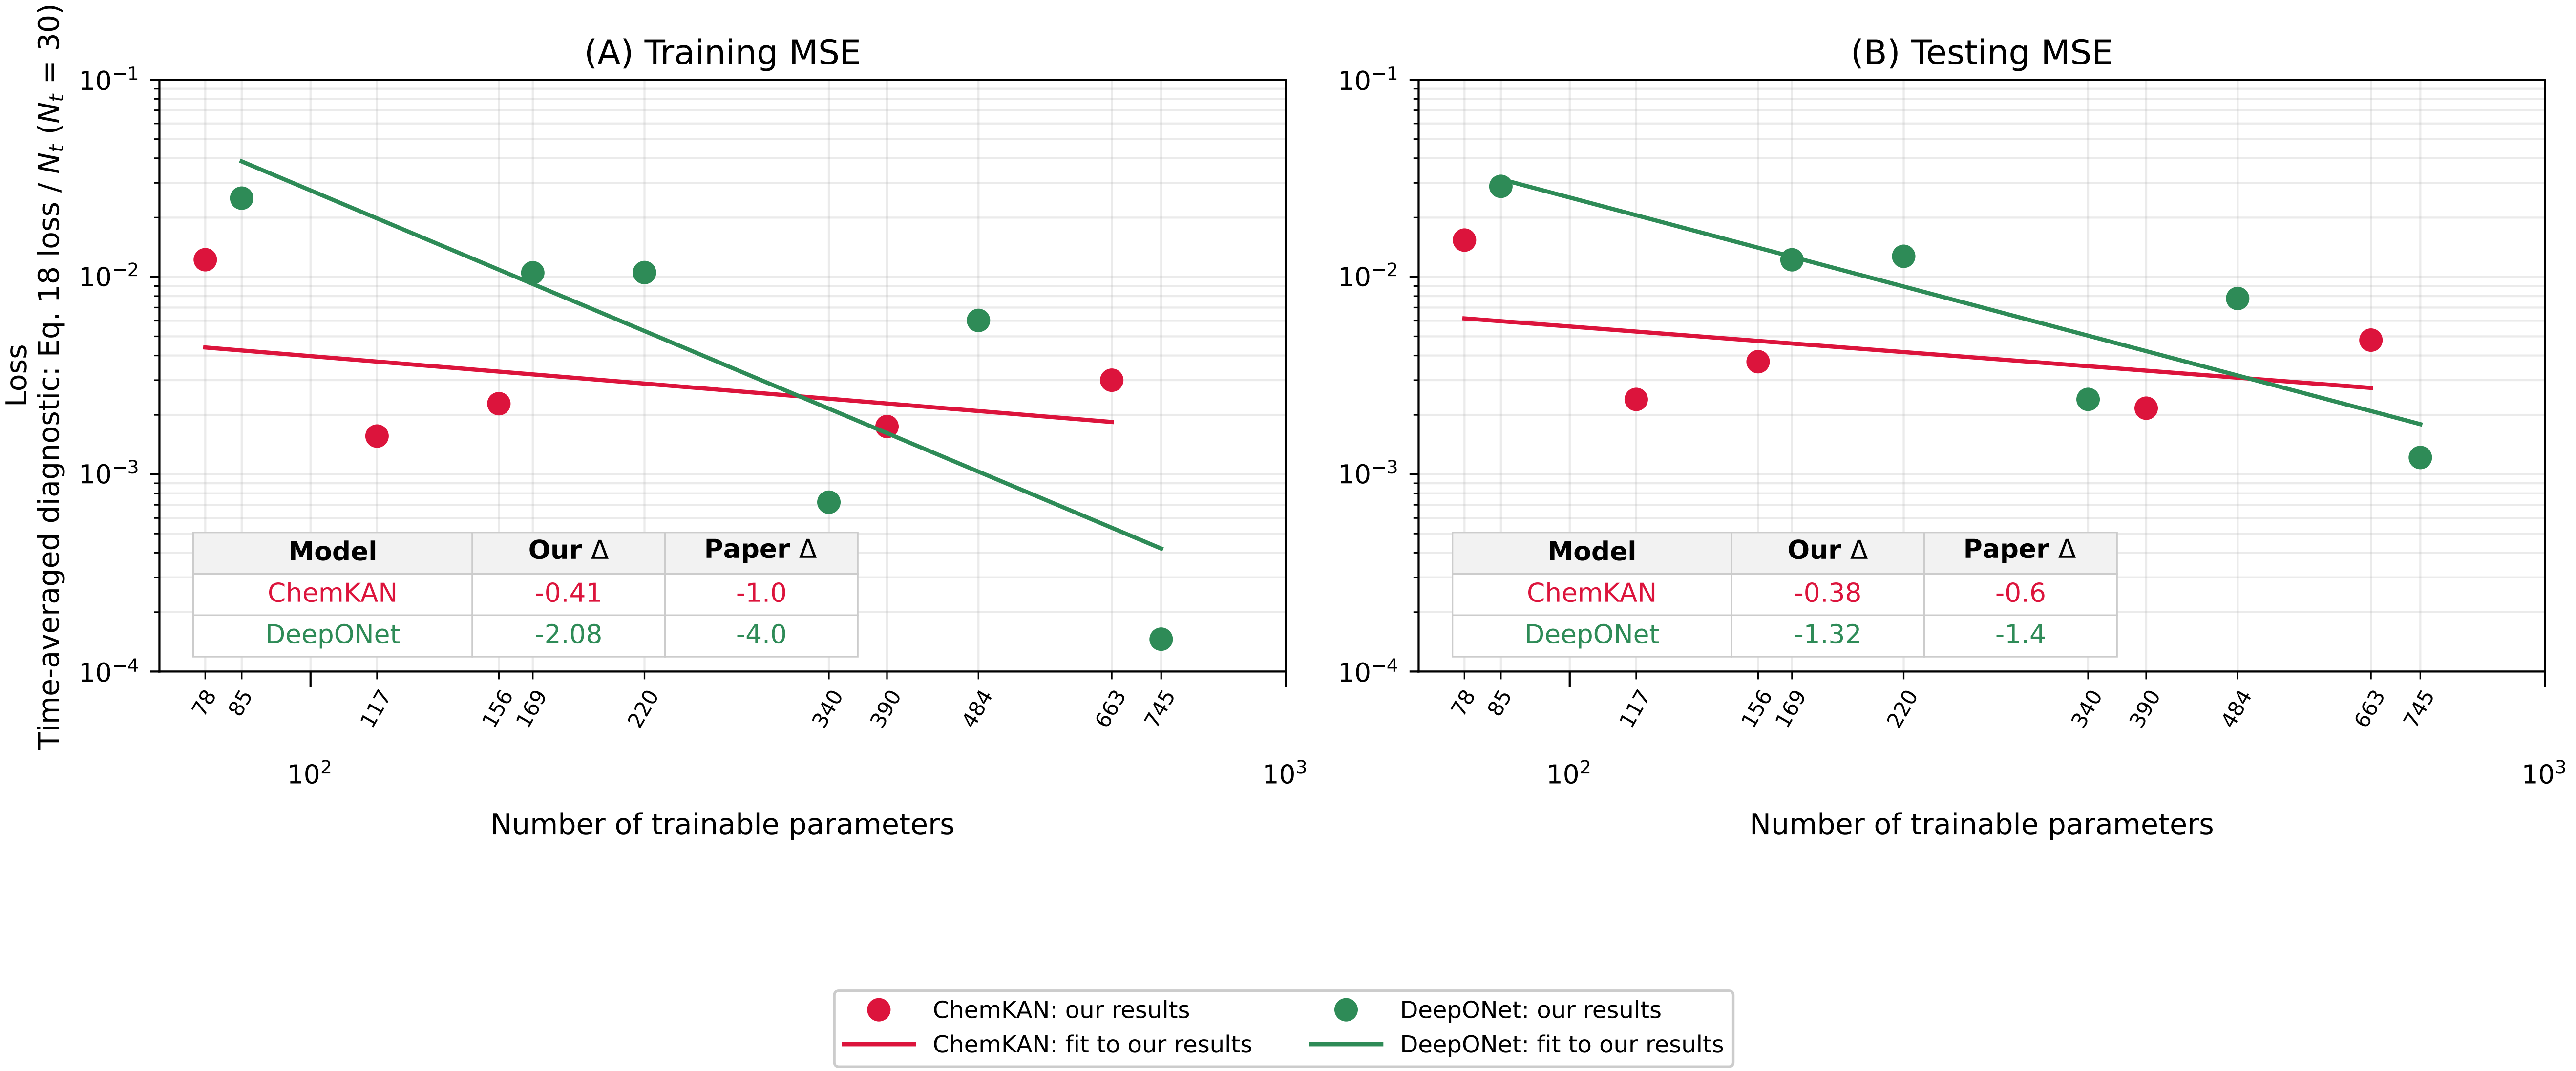
Fig. 4 - neural scaling: ChemKAN n_mu=ceil(h/2)

DeepONet: reference_final_trunk_relu. Circles: measured results; lines: fitted trends.



(A) Training MSE

Model	Our Δ	Paper Δ
ChemKAN	-0.41	-1.0
DeepONet	-2.08	-4.0

(B) Testing MSE

Model	Our Δ	Paper Δ
ChemKAN	-0.38	-0.6
DeepONet	-1.32	-1.4

Δ is the slope of log(loss) vs log(parameters). Our fits use all runs; the paper reports fits before saturation.
