
Local perturbations around reference states (dots): one input varied, all others fixed. T over the training range; [TG], [ROH] x0.8-1.2, clipped to the training range.
d[TG]/dt
d[ROH]/dt
d[DG]/dt
d[MG]/dt
d[GL]/dt
d[R′CO2R]/dt
vary T
vary TG
vary ROH
rate [mol L−1 s−1]
T [K]
[TG] [mol/L]
[ROH] [mol/L]
train traj. 10, t = 1.0 s, T = 333.5 K
train traj. 10, t = 5.2 s, T = 333.5 K
train traj. 10, t = 20.7 s, T = 333.5 K
test traj. 3, t = 8.3 s, T = 334.7 K
ChemKAN, within 3 spacings of a training state
ChemKAN, farther from the training states
known Arrhenius kinetics
